

**Leukaemia Research Fellowship, Malignant Haematology & Stem Cell Transplantation Service, Alfred Hospital, Melbourne**

Commencing February 2010

Fully funded. 2 years. Enrollment in higher degree (MD) preferable. No service work. Position will be focused on

1. Novel therapeutics (predominantly epigenetic modifying strategies) in AML within the context of an active in-house phase 1b and RIC allogeneic programme.
2. Development and implementation of correlative studies related to clinical programme focusing on predictive biomarkers and pharmacodynamics
