

Work for a year as a Locum haematologist in New Zealand

Starting 23rd January 2012 (Flexible) for 12 months

Christchurch Public Hospital is a 500 bed hospital with a tertiary referral haematology unit including the South Island Bone Marrow Transplant Unit. Join five other haematologists in both clinical and laboratory, benign and malignant haematology work. The post also involves medical student lecturing at the University of Otago (Christchurch) Medical school.
