

Perkins Resources

Research Fellow - Research and Business Development

Our client is a not-for-profit organisation responsible for the provision, collection, screening, processing and distribution of blood, blood products, tissues and related services Australia wide.

They are seeking to appoint a Research Fellow within Research and Business Development to conduct research as part of the Experimental Development team. This position is full time and will be located in Clarence Street, Sydney.

The role will involve assisting the Major Program Leader to develop, manage and deliver research projects involving the evaluation and implementation of new technologies that have a direct impact on the collection and processing of blood and blood products, for example platelet additive solutions, blood bags and filters. The role will involve managing resources including a team of junior and senior research scientists. The role will also involve developing linkages and networks with organisations and individuals within the organisation and external to organisation that are relevant to the research projects. If you are a highly motivated researcher looking for an opportunity to use your research and management skills then please apply.

To be successful in this role you will have:

- A Doctor of Philosophy, Masters by Research or equivalent in a relevant biological discipline
- Evidence of excellent written and verbal communication skills, including preparation of project proposals, grant submissions, reports, manuscripts and presentations is required.
- Relevant research experience with a record of original, independent research.
- Demonstrated ability to comprehend and analyse complex scientific concepts and data.
- Demonstrated experience in establishing collaborations and partnerships with other researchers.

It would be desirable to have:

- Knowledge and appreciation of current and emerging issues in blood banking policy and service delivery needs.
- Experience in the preparation of funding submissions and a record of achievement of successful funded research programme outcomes.

If you wish to discuss this opportunity further please contact Deirdre Perkins from Perkins Resources on (07) 3369 3800 or email your details to Deirdre.perkins@perkinsresources.com
