

Clinical Haematology Fellow, St George Hospital

Applications are invited for the position of the Clinical Haematology Fellow in the Department of Haematology at St George Hospital, a major tertiary referral and teaching hospital affiliated to the University of NSW. The Haematology Department provides management of a broad range of malignant and non-malignant blood diseases, with a particular strength in management of thrombotic and bleeding disorders. The department has an active clinical and laboratory-based research program with an international reputation and supported by NHMRC, ARC, university and industry grants. This advanced training position would be suitable for a senior registrar (in 3rd or preferably 4th year / post-4th year) who wishes to consolidate his/her clinical haematology experience, particularly in Thrombosis and Haemostasis. There will be an opportunity to develop research experience (clinical and basic / molecular biology research), particularly a “taste-of-research” experience before potentially proceeding to PhD or equivalent.
