

**Haematologist
North Shore Hospital
Waitemata District Health Board
Auckland, New Zealand**

Waitemata DHB is the largest DHB in New Zealand serving a population of approximately 500,000 living in the North and West of Auckland. Comprised of two sites, our hospitals have some of the best Specialists in New Zealand, are located close to the heart of Auckland City and are within minutes of beautiful beaches.

Applications are invited from a suitably qualified specialist Haematologist to join a dynamic and growing haematology department based at North Shore Hospital. We currently employ 21 staff, including four consultant haematologists in both clinical haematology and clinical research.

Clinical areas include malignant haematology, a large acute thrombosis service, as well as general haematology. There is an active research department with studies in both malignant haematology and thrombosis. There is potential for involvement in diagnostic haematology and transfusion medicine. We would also consider the specialist interests of the successful applicant in the development of this role.

Applicants must have or be eligible to obtain vocational registration with the Medical Council of New Zealand and have both FRACP and FRCPA.

Salary and conditions of employment will be in accordance with the New Zealand Association of Salaried medical specialists' award agreement.

Please apply online at www.aucklandhealthjobs.com using position number 025275. For more information, please contact Dr Ross Henderson Ross.Henderson@waitematadhb.govt.nz. We are happy to speak to prospective applicants over the phone, email your phone number and we will arrange to call you.
