

Fellow in Haematology: Available February 2020

A position has arisen at Royal Perth Hospital (RPH) for a Fellow/ Senior Registrar in clinical and laboratory haematology in 2020.

The position is suitable for trainees who have completed RACP and RCPA joint training and wish to develop further expertise in clinical research.

The main role of the position is to coordinate and manage the haematology department clinical trials. The department is involved with clinical trials across the spectrum of haematology malignancies with a focus on acute myeloid leukaemia, myeloma and lymphoma

Cell and Tissue Therapies of Western Australia (CTTWA) is a facility on site at RPH responsible for stem cell processing and the development of cellular therapies. The haematology department works closely with CTTWA which is currently running trials assessing the immunomodulatory effects of mesenchymal stem cells in myelodysplasia, inflammatory bowel disease and organ transplant rejection.

CTTWA is also actively involved with a CAR-T cell therapy developmental program which is expected to progress to clinical trials in the next year.

The successful applicant will work closely between the Haematology department and CTTWA in the development and management of these trials.

Other responsibilities include a shared service commitment with other fellows and advanced trainee in performing and reporting bone marrow biopsies, reporting laboratory results including peripheral bloods and flow cytometry. Clinical responsibilities include inpatient care, outpatients and a consultative service and an on call commitment.

Please forward an expression of interest and a CV by 24 July 2019 with the names and contact details of 2 referees
